

IUCLID5 Training For REACH Registrants

Run regularly throughout the year – check www.reachready.co.uk for the latest dates.

Why Attend?

IUCLID5 (International Uniform Chemical Information Database) is the official tool for REACH data collection and with around 9000 user input fields it's just as complicated than the REACH regulation itself.

Our comprehensive and interactive two-day IUCLID5 User Training Course will teach you how to use it. We cover the overall functionality of IUCLID5 as the interface between industry and the European Chemicals Agency (ECHA) in Helsinki. You will be taught how to use IUCLID5, its data object structure, what it can do for you and how it delivers its primary purpose of creating a REACH registration dossier.

The training offers a hands-on experience and you will learn through undertaking practical exercises under the expert tutelage of REACHReady and TRASYS staff.

Who Should Attend?

Participants with a basic knowledge of REACH, who want to become familiar with the main IUCLID5 user functions. This course provides essential training for all end-users of IUCLID5 and will prove invaluable to you when you make your company's input to your substances' REACH dossiers.

What's covered in the programme

Legal basics

- What is IUCLID5 and what is it used for? (It's not just for REACH!)
- Relevant REACH basics: Pre-registration for phase-in substances, registration, evaluation, authorisation, restriction

System overview

LEO, EC Inventory, Reference Substance Inventory

- IUCLID5 and the other REACH-related IT systems
- Overview of the main IUCLID5 features, the graphical user interface and how to use it.
- A description of key IUCLID5 concepts: Legal Entity & Legal Entity Object; EC Inventory; Reference Substance & Reference Substance Inventory; Substance
- When to create & use an official LEO vs. non official LEO
- How to use the reference substance inventory; how to create and use a new reference substances

Substance dataset – part 1:

Fundamental data

Substance dataset – part 2:

Endpoints SR and Endpoint Study Summaries

- The fundamental data for a substance definition and the concept of substance datasets
- Definition and description of the concept of endpoint: endpoint study record; endpoint study summary
- Operations on study records (rename, sorting and deleting)
- Literature references

Dossier Creation

- Definition and description of the concept of "dossier" in IUCLID5
- Overview of the different dossier templates (used for REACH)
- Operations with dossiers
- Other topics: dossier header, annotations, dossier comparisons.

System preparation

- Introduction to the installation of IUCLID5
- Step-by-step description of how to install the standalone version.
- How to import the inventories (EC, reference substances inventories)

What to expect on the day

REACHReady's unrivalled knowledge of the regulation is combined with TRASYS' expertise with the REACH software to deliver our 2-day IUCLID5 User Training Courses.

They limited to a **maximum of 20 participants**, each will be provided with their own dedicated PC to use throughout the training, and there will be a **minimum tutor to student ratio of 1:7** ensuring a really practical experience and a good level of interaction. We have an informal style so there will be plenty of opportunity to ask questions! Lunch, course materials and refreshments are provided.

We offer a full range of REACH-IT/IUCLID5 training courses from our basic foundation workshops to advanced training for REACH Managers – see www.reachready.co.uk
