

# Advanced IUCLID5 Training for REACH Registrants

Run regularly throughout the year – check  
[www.reachready.co.uk](http://www.reachready.co.uk) for the latest dates.

## Why Attend?

If you have already received our basic “IUCLID5 for REACH Registrants” training and having used what you learnt, you want to find out about some of the more advanced IUCLID 5 functionality, then this is the workshop for you.

Having already learnt how to create and input your LEO, ESRs and ESSs, this workshop will help you understand some of the advanced operations you can do with Endpoint Study Records and Endpoint Study Summaries as well as learning how to use templates, categories, matrices and learning how to use the Mixtures function.

Our practical approach means that you will have the opportunity to put what you have learnt into practice through exercises on each subject.

## Who Should Attend?

Participants with a basic understanding of IUCLID 5, who want to find out more about the advanced functionalities. The course provides essential training for all end-users of IUCLID5 and will prove invaluable to you when you make your company’s input to your substances’ REACH dossier. This course will also help save time and money through improved data organisation and structuring.

## What’s covered in the programme

- Advanced operations within the data subset
  - Detailed description of the substance dataset (sections 0-3 in IUCLID5)
  - Details of the Classification & Labeling
- Advanced operations with end points study records and summaries
  - Detailed description of the Endpoint Study Records
  - Operations on study records (rename, sorting and deleting)
  - Literature references
  - Definition and description of the concept of endpoint study record reference
  - Operations with the ESR references (create, copy/paste, detach)
- Templates
  - Definition and description of the concept of template
  - Two types of templates
    - template for copy
    - inherited template
