

## REACH registration: Inquiry and the next steps

**CIA offices, London, or a location to suit you**

### Who should attend?

Everyone who needs to submit an Inquiry this year for

- ✓ an ELINCS substance
- ✓ a substance without a valid pre-registration
- ✓ a substance new to the EU market

This workshop will be of particular interest to registrants who need to submit a dossier in 2012 for a non-phase-in substance or for a phase-in substance without a valid pre-registration – in other words if you need to register before you manufacture or import a substance.

You'll get the most from the day if you have some knowledge of REACH and your company-specific needs for registration, but if not we can still help! Do let us know if you're not familiar with IUCLID5 and we can cover that in more detail.

### Why attend?

If you are about to register a substance for REACH then the chances are you won't be working in a SIEF (substance information exchange forum). You might even be "going it alone" with no other registrants to share data, costs or the work. You'll need to prepare and submit your own registration dossier in IUCLID5 using, as a minimum, your own substance identity data. You might also need to generate new information to complete your registration.

If you can't take advantage of the 2013 and 2018 deadlines and need extra guidance in understanding what you need to do to register your substance this year then this is the day for you.

We'll help you:

- ✓ explore the dossier options open to you
- ✓ grasp what's needed to identify your substance
- ✓ make the decisions to identify the information to incorporate into your IUCLID dataset
- ✓ understand the submission process in REACH-IT
- ✓ avoid common problems seen in registration

To do this we'll be using a combination of teaching and practical demonstrations. We have an informal style so there will be plenty of opportunity to quiz our experts throughout the day.

### Suggested Programme

#### Non phase-in registration

ELINCS substances, missed pre-registration, cannot late pre-register, new substances to the EU market, timings

**Registration options and dossier types** What must you do if you can't pre-register? Inquiry and substance identification. Registration dossier types (Inquiry, PPORD, Intermediates, Registration)

#### Substance identity

Substance "sameness" issues, defining your substance in IUCLID

#### Data requirements for your registration

What's needed for registration: PPORD, intermediate, and full dossiers. The Chemical Safety Report (CSR). Strictly controlled conditions for intermediates

#### Accessing the data you need

How to get the data for your submission. Existing registrants, data sharing agreements, Letters of Access, the 12-year rule, generating new data

#### How to register

IUCLID and REACH-IT, CSR and other documentation, dossier submission, completeness and review processes, timing

#### Tips on first-time acceptance

Common dossier problems and ways to avoid them
