

## Event programme

### CLP – an introduction to the new Regulations

30 March 2010 – Hilton Coventry

#### Who should attend?

Anyone responsible for classification and labelling as well as those accountable for wider product stewardship issues should attend. You'll get the most out of the course if you have some knowledge of the current classification and labelling system.

Don't worry if you don't - get in touch with us and we'll help you get up to speed.

**Book before 5 March for an "early bird" discount.**

#### Why attend?

On 20 January 2009 the new EU Regulation on Classification, Labelling and Packaging of substances and mixtures (CLP) came into force – do you know what this means for your business?

#### Come to this training course to find out

Tackling the business and technical implications of the United Nations' **Globally Harmonised System** (GHS) and the EU's Regulation on CLP will be high on the list of priorities for most people already dealing with REACH. And for anyone currently putting substances on the EU market, even in very small quantities, the deadline for action is 30 November 2010, so there is no time to waste.

Responding to REACHReady subscribers' requests for a shortened version of our two-day "CLP - a business based introduction to the new Regulations" training, this one-day training course is designed to help you understand the impact of this new regulation on your business, what you have to do to comply and how to make a start on your compliance plan.

**Book your place today** and rest assured you'll be off to a flying start with the CLP regulation.

#### Programme
