

REACH Intensive

Beaumont House, Old Windsor, Berkshire SL4 2JJ

16th March – 20th March 2009

Nobody knows more about REACH.

Why Attend?

By popular demand REACHReady is now offering a **week's residential** REACH training course. This course is designed to provide delegates with a complete overview of the REACH legislation - from the basics through to some of the technical and scientific issues which will need to be dealt with prior to substance registration.

Delivered by **REACHReady world-leading experts** this will be an excellent opportunity to spend an intensive week getting to grips with this complex regulation.

As with all REACHReady courses and workshops, there will be plenty of opportunity to **ask questions** of the experts and share your REACH experiences with others. Our experts will be on-hand throughout the week, providing attendees with the opportunity to discuss issues either formally or informally.

The booking price for the week is inclusive of four night's hotel accommodation, meals, all course materials and of course 5 days of training.

Places are limited and will be allocated on a 'first come, first served' basis.

Who Should Attend?

This week is suitable for anyone who needs to learn more about REACH, whether based inside or outside the EU.

This event is particularly suitable for manufacturers and importers of substances in the EU who have pre-registered, or non-EU manufacturers who have appointed an only representative, but who will be managing much of the SIEF and registration work themselves.

Downstream users may also be interested in attending to understand the process (but please note - downstream users do not have an active role in the SIEF).

REACH Intensive: a 5 day intensive REACH residential course.

Outline Programme

Day 1 The Basics

- An introduction to the REACH legislation
- Late "pre-registration"
- An overview of the registration process
- An overview of finished goods (Articles) and issues for importers and suppliers

Day 2 Communication is key

- Communication within the supply chain
- Implications for downstream users
- Substances of Very High Concern (SVHCs) in the supply chain

Day 3 What to expect in the SIEF

- Pre-SIEF activities and how to ensure you are in the right SIEF
- Appointing an Only Representative (OR) or Third Party Representative (TPR) and working with your OR / TPR
- Staying on the right side of the law in a SIEF
- Tools for working in a SIEF

Day 4 REACH testing and data requirements

- An overview of the science behind the tests required under REACH
- Review how REACH data is assessed
- Learn how to make decisions regarding data use and data gaps

Day 5 Putting the theory into practice

- Review the week's learning
- Participate in a SIEF simulation exercise
- Practice the technical and practical skills learnt earlier in the week
- Receive feedback from the REACHReady experts
